Importancia para Europa: Digital Single Market

Why we need a Digital Single Market

315 million Europeans use the Internet every day

A Digital Single Market can create up to €340 billion in additional growth, hundreds of thousands of new jobs, and a vibrant knowledge-based society

European Commission

Binary code background

The slide features the European Commission logo at the top right. The main title 'Why we need a Digital Single Market' is displayed prominently in the center. Below it, two callout boxes provide statistics: '315 million Europeans use the Internet every day' on the left, and 'A Digital Single Market can create up to €340 billion in additional growth, hundreds of thousands of new jobs, and a vibrant knowledge-based society' on the right. The background is a blue gradient with a subtle pattern of binary code.
